Personal Profile

I started working in the theatre in 2012. I used my interest in railways and studied 2 years of Mechanical Engineering. I wanted to keep trains as a hobby in the end and I turned to the theatre, where I studied 2 years of Production Arts at Kingston College. I then went onto a 3 Year BA (Hons) course on Lighting Design at Rose Bruford, where I still am today. Furthering my experience in the industry, I would like to become a freelance lighting designer, specialising in my passion for Dance.

SKILLS

Communication Skills

Having had experience through my voluntary work of dealing with the general public, I consider myself to be a very adaptable and flexible person. I can express myself very clearly verbally and in written form, which I consider important in the smooth running of any environment. This has been put into practice during my employment where I deal with customers and colleagues.

Technical

I have extensive experience of Windows 98, 7 & 8/8.1 to present as well as IOS 7 to present. I regularly use Microsoft Office Packages such as Excel, Word, and PowerPoint 2007 to present. I have a working knowledge of Mac-based software. I am also familiar with Adobe Fireworks, Flash, Photoshop and Dreamweaver, AutoCAD 2012-19, Avolite TI, Highend – Hog 4 OS and EOS.

INTERESTS

My interests include model engineering, mechanical engineering – where I am involved with the Surrey Society of Model Engineers (SSME). SSME operates and fabricates model locomotive in the scale of 2.5 inches, 5 inches & 7 ¼ inches. The site is open to the general public for train rides 12 times a year with a special in December for Santa. Occasionally we have a portable track that visits fairs/fêtes. I also enjoy working as a theatre lighting technician, cycling and cooking.
